The following categories describe different ways that we may use and disclose medical information. For each category of uses or disclosures we will try to give some examples. Not every use or disclosure in a category will be listed.

**For Treatment.** We may use medical information about you to provide you with medical treatment or services. We may disclose medical information about you to doctors, nurses, technicians, training doctors, or other health care professionals who are involved in taking care of you. For example, a doctor treating you for a broken leg may need to know if you have diabetes because diabetes may slow the healing process. **For Payment.** We may use and disclose medical information about you so that the treatment and services you receive may be billed to and payment may be collected from you, an insurance company or a third party. We may also use and disclose medical information about you to obtain prior approval or to determine whether your insurance will cover the treatment, or to undertake other tasks related to seeking payment for services provided. We may also disclose medical information to another health care provider who is or has been involved in your treatment, so that that provider may seek payment for services rendered.

**For Health Care Operations Purposes.** We may use and disclose medical information about you for health care operations purposes. This is necessary to make sure that all of our patients receive quality care. For example, we may use medical information to review our treatment and services and to evaluate the performance of our staff in caring for you, or to otherwise manage and operate NAPS effectively. We may also disclose information to doctors, nurses, technicians, training doctors, medical students, and other NAPS personnel for review and learning purposes. We may remove information that identifies you from this set of medical information so others may use it to study health care and health care delivery without learning who the specific patients are.

For example, a research project may involve comparing the health and recovery of all patients who received one medication to those who received another, for the same condition. All research projects, however, are subject to a special approval process. This process evaluates a proposed research project and its use of medical information, trying to balance the research needs with patients' need for privacy of their medical information. Before we use or disclose medical information for research, the project will have been approved through this research approval process, but we may, however, disclose medical information about you to people preparing to conduct a research project, for example, to help them look for patients with specific medical needs, so long as the medical information they review does not leave NAPS. Otherwise, we will almost always ask for your specific permission if the researcher will have access to your name, address or other information that reveals who you are, or will be involved in your care.
